II. Introduction

The Medical Education and Drugs Department (MEDD) of the Government of Maharashtra is the nodal department for framing policy decisions in the domain of Medical Education and Research for the State of Maharashtra. The MEDD has administrative control over 67 institutes including 21 government medical colleges, and affiliated dental, nursing and paramedical hospitals and colleges. The main function of the department is to impart undergraduate and postgraduate medical education to the students at government medical colleges and provide the necessary facilities in these medical colleges as per the standards of the National Medical Commission/ National Board of Examination. Additionally, institutions under the MEDD also provide referral services and tertiary care to patients. Maintaining the quality of service to the patients as well as the quality of treatment, medicine and related research are integral functions of this department.

MEDD is inviting local and/ or international sponsors interested in financing, equipping, operating, maintaining and transferring the Project through a long-term PPP concession agreement. The selection of PPP sponsors by MEDD will be done through an international competitive tender expected to commence this year with the help of the International Finance Corporation (IFC), a member of the World Bank Group.

III. Brief Scope/ Description of Work

The Medical Education and Drugs Department (MEDD) of the State of Maharashtra, India, is planning to develop a greenfield super specialty hospital in the city of Nagpur through a Public Private Partnership (PPP). The planned Dr. Babasaheb Ambedkar Super Speciality Institute of Medical Education & Research (BASIMER), Nagpur will involve the greenfield development of a 615 bedded super specialty hospital through a private developer, which would be transparently selected through a competitive bid process. The 6.5-acre site for the proposed hospital is 3.5 km from the existing Indira Gandhi Government Medical College (IGMC) campus in Nagpur.

The private developer would be responsible for designing, building, financing, operating, maintaining and the transfer of the greenfield teaching hospital under a long-term

concession period of about 30-35 years. In addition to the designing, building, and full operationalization of the hospital and associated healthcare facilities, the private operator will deliver all clinical services, including recruitment of doctors, nurses, and other health professionals, as well as the provision of all medical equipment and all pharmaceuticals necessary for clinical services delivery. It is also proposed to start a minimum 70 seat (MD/MS/DNB) program in 17 broad specialities (Medicine, Pediatrics, Dermatology, Psychiatry, Radiology, Laboratory Medicine, Biochemistry, Pathology, Microbiology, Anesthesia, Surgery, Orthopedics, OBGY, ENT, Ophthalmology, Pulmonary Medicine, Emergency Medicine) and a 40 seat (DM/MCh/DNB) program in 11 super specialties (Cardiology, Nephrology, Urology, Hematology, CVTS, Neurosurgery, Gastroenterology, Gastrointestinal Surgery, Pediatric Surgery, Plastic Surgery, Neurology) as per NMC/NBE norms at the Dr Babasaheb Ambedkar Super Speciality Institute of Medical Education & Research (BASIMER), Nagpur (the "Project").

To facilitate the development and implementation of the Project and PPPs, the State of Maharashtra has adopted its own PPP policy framework, and the Government of India (GoI) approved in December 2020, a Viability Gap Funding (VGF) Scheme for financial support to PPP projects in the social infrastructure sector (e.g., healthcare and education projects). The GoI VGF scheme can support a portion of capital and operational expenditures to ensure a financially viable PPP project. The size of the facility, the plan for implementation (i.e., whether there would be a phased implementation) and other relevant details of the PPP structure will be determined and included in the request for proposal (RFP) for the Project.
